

This is an example of all things being square to your aim line at impact.

All 3 metrics would read 0.0 degrees

Plus metric numbers mean OPEN

Negative metric numbers mean CLOSED

- **Impact Angle - Face angle at impact.**
- **Putter Path - It is the tangent angle at the impact position of the circular arc through which the putter passes.**
- **Launch Direction of the ball. In other words, starting line of the ball.**

In general, the direction of the ball in putting is affected 95% by the impact angle and 5% by the path.
