## Putting Speed Control Game

Object: Putt the balls into the hole or within the 6ft square

Task: Take 3 putts from each location

Goals:

From 5 to 20 feet you must make 3 of 3 or be within the 6ft square From 25 to 40 feet you must make 2 of 3 or be within the 6ft square From 45 to 60 feet you must make 1 of 3 or be within the 6ft square

Penalty: If you do not meet the goal for a given distance, start over again at that distance.

## Alternative Scoring System

Taking three putts from each location and making them or being successful in keeping the ball inside the 6ft square can take some time. That is depending upon your skill level.

Another option is to take 1 putt from each location and keep score. That would be one point for each made putt or for a ball inside the 6ft square.

Repeat this 3 times for a total of 36 putts.

Keep a record of how many putts are successful from each distance.

This is a great way to determine what distance putts are giving you trouble.
